a journey to perfection

## *CACI Treatment and Price List*

Backed with over 20 years of medical research, CACI has the reputation for being the finest, non-surgical face lift technique available. As we age our facial muscles naturally start to lose tone and elasticity. During each treatment all the facial muscles are gently manipulated and re-educated using a series of precise movements to form a lift, leaving skin tighter and smoother with a more youthful completion. Although results can be visible after the first treatment a course is recommended of between 10 and 12 with maintenance every 4-6 weeks. With every 10 or 12 courses booked, two are free.
